

Project Description

Client: Town of DeWitt

Project: Park Hill Neighborhood Study

Services Performed:

Kent Environmental Planning & Design (KEPD) managed the completion of the Park Hill Neighborhood Study. This plan detailed the redevelopment of a 1950's vintage neighborhood in the Town of DeWitt. The plan detailed several alternatives for streetscaping and infrastructure improvements. Three neighborhood meetings were held to secure community input, rank issues, and identify preferred concepts. Construction of phase one was completed in 2006.
