

Project Description

Client: Cayuga County

Project: Port Byron Streetscape Study

Services Performed:

Kent Environmental Planning & Design (KEPD) managed the completion of the Village of Port Byron Streetscape Study. This plan detailed the redevelopment of the Village's CBD with a focus on its downtown core. The plan detailed several alternatives for streetscaping and infrastructure improvements. Three neighborhood meetings were held to secure community input, rank issues, and identify preferred concepts. In addition, several "walk-about" were performed with the project advisory committee brainstorming with the project's consultant team.
